

Fatigue-free work meets maximum precision.

More productivity, more precision: ec-tubes relieve workers, absorb tool weight & reaction moments - with unchanged flexibility.

Zero Reaction Moment

Perfect handling

Absolute precision

Full flexibility

The mount is compatible with any type of tool.

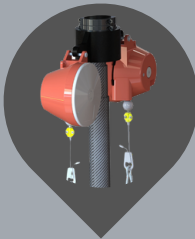

EC-Grib with keys for special functions

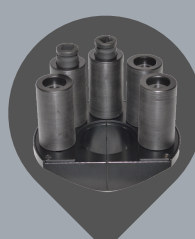

Can be easily integrated into any process

OK/NOK-Light

Balancer ensures zero tool weight

Nut change  
The box is integrated into the tube.

If you have special requirements, that's no problem - we offer exclusively customized solutions!

ec-tecs provides you with everything from a single source:  
Hardware, software, assembly and repair - contact us now for an initial workplace analysis.

**Steel & Carbon fiber**

**Fatigue-free work meets maximum precision.**

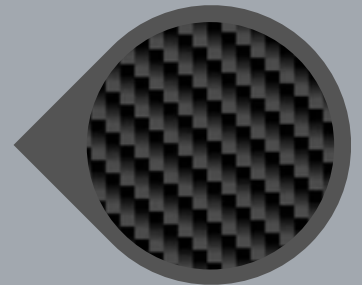

Steel tubes are the ideal choice for applications where robustness, stability, and a solid industrial design are paramount. They impress with their durable construction and high suitability for everyday use in assembly environments.

Our standard models cover the following Nm: 200 Nm; 400 Nm; 800 Nm; 1000 Nm; 2000 Nm.

Special solutions with different Nm values are also possible upon request.

The carbon fiber tubes offer maximum smoothness combined with high stability. The use of specially developed carbon components results in a particularly high-quality solution for ergonomic, precise, and dynamic assembly processes. Our standard models cover the following torque values in Nm: 50 Nm, 100 Nm, 200 Nm, 400 Nm, 600 Nm, and 800 Nm. Custom solutions with different torque values are also available upon request.
